

Science Café with Luděk Hynčák

Theme: Human body modelling

Thursday 3 October 2019, 19:00

Pilsen House

Place de Jamblinne de Meux 31, Brussels

Luděk Hynčák is the Vice-Rector for Research and Development and vice director of the New Technologies – Research Centre at the University of West Bohemia. He is also vice president of the International Federation of Automotive Engineering Societies (FISITA) and Visiting Professor at the Tianjin University of Science & Technology, China. His research interests include human body modelling, biomechanics and mechanics of discrete systems. He focuses on virtual human body models used for injury analysis related to vehicles impact.

Registration at http://geform.tc.cz/science_cafe15

The discussion will be followed by a glass of wine.
